

Translation Manager and Visual Translator are now Open Source

Title	Translation Manager and Visual Translator are now Open Source
URL Name	Translation-Manager-and-Visual-Translator-are-now-Open-Source
Article Number	000158245
Environment	Product: OpenEdge Version: 12.x OS: Windows Other: Translation Manager, Visual Translator
Question/Problem Description	<p>The Translation Manager and Visual Translator products reached end of life and were eliminated from the development toolset in OpenEdge Release 12.0.</p> <p>A few requests have been made to make the source code for Translation Manager and Visual Translator available under an open source license.</p>
Steps to Reproduce	
Clarifying Information	
Error Message	
Defect Number	
Enhancement Number	
Cause	<p>Progress recognized that these tools may still be useful for anyone coming from an older version of OpenEdge to a 12+ release and decided to release the source as requested.</p> <p>Anyone is welcome to use the source code with an OpenEdge 12 based development environment or even older versions.</p> <p>The source can now be accessed at https://github.com/progress/adetran.</p> <p>There are gradle based build scripts available in the repository to help with compiling the application. The repository also includes the database schema for the translation manager and translation kit databases.</p>
Resolution	<p>Some very rudimentary sanity tests have been done to ensure it builds and launches with OpenEdge 12.</p> <p>Please note the README.md file with instructions, license information, disclaimer and some release notes.</p> <p>Note: This software is released as an open source project under the Apache 2.0 license.</p> <p>Note: The software is NOT supported by Progress Software.</p> <p>You can find more information about this change here: Frequently Asked Questions (FAQ) regarding the Translation Manager OpenSource initiative</p>
