<b>Description</b>			

## History

### #1 - 10/10/2011 04:54 PM - Greg Shah

@45118 - recreate:

The following Progress 4GL code compiles in Progress but fails in the P2J parser:

```
define menu my-popup-menu
  menu-item m-one    label "One"
  menu-item m-two    label "Two".
  menu-item m-three  label "Three".
...

on choose of menu-item m-three in menu my-popup-menu
do:
  /* something */
end.
...

assign my-browse:popup-menu in frame my-frame = menu my-popup-menu:handle.
```

Notice the extra "." character in the format phrase for the m-two widget. The following code is not a valid standalone statement or expression, but it doesn't fail in the 4GL.

**#2 - 10/11/2011 08:19 PM - Greg Shah**

@45119 - addl info:

The customer confirmed that the menu in fact does appear when the code is run. This means that the period character in this case is just ignored.

The parser was modified accordingly, to check if the LA(2) token is a MENU-ITEM and if so to consume a DOT that is LA(1). This appears to be what Progress does. The change only affects the DEFINE MENU parsing.

**#3 - 10/11/2011 08:21 PM - Redmine Admin**

@45120 - Status changed from WIP to Closed

**#4 - 04/12/2012 11:23 AM - Greg Shah**
