#### History

##### #1 - 10/09/2012 07:03 AM - Greg Shah

Create a readme.txt file in the chemtutor/ directory to explain:

1. How to setup the project (e.g. things like how/where to create the link to p2j/ that is needed).
2. How to convert the project.
3. How to build the project.
4. How to import the database. It looks like you have a pre-created database there. That is OK, but I want to make sure that the tools are there to be able to import again at any time.
5. How to run the application (server and client).

##### #2 - 10/16/2012 08:58 AM - Greg Shah

Please remove references to p2j-deploy-exclude-testcases if it is no longer needed.

##### #3 - 01/14/2013 12:28 PM - Greg Shah

- Status changed from WIP to Closed
