- Status changed from New to WIP

#6 - 02/12/2014 04:33 PM - Hynek Cihlar

- File hc_upd20140212a.zip added

The attached file contains log function implementation and related changes for review.

The implemented log function yields the same outputs as the Progress native log function. The only exception is the logarithm of 1 to base 1. In this case Progress returns zero instead of the expected unknown value.

Testcases committed in the file testcases/uast/math/log.p.

Code Review 0212a

It looks pretty good. Fix these minor issues and get it tested:

1. I'd prefer to add an abstract `NumberType.toBigDecimal()` instead of adding a static helper to `Utils`. The sub-classes can implement the non-lossy implementation directly.
2. `MathOps` copyright end year needs to be update to 2014.

#8 - 02/14/2014 07:13 AM - Hynek Cihlar

- File `hc_upd20140214a.zip` added

Introduced `toBigDecimal` abstract method in `NumberType` and fixed the file headers. The code changes passed regression testing.

Please, review.
