Description			

History

#1 - 10/21/2012 06:11 PM - Eric Faulhaber

This task is on hold until a customer requires it.

#2 - 10/21/2012 06:13 PM - Eric Faulhaber

This task will require:

- using Oracle's Java support to run our Java UDFs inside the server process;
- creating an Oracle P2JDialect to deal with any idiosyncrasies of the Oracle database;
- ensuring the DDL generation part of the conversion works properly;
- ensuring the data import works properly.
