<b>Description</b>			

#### History

##### #1 - 10/22/2012 03:12 PM - Eric Faulhaber

This will allow simplification of the code handling this as well as improvements in unreachable processing (which happens after fixups and before annotations). For example, there is a case where an unlabeled next that isn't in a loop acts as a return, but today unreachable code processing doesn't detect this.

See testcases/uast/next\_as\_return.p.

##### #2 - 10/31/2012 03:53 PM - Greg Shah

- Target version set to Code Improvements

##### #3 - 11/16/2016 12:46 PM - Greg Shah

- Target version deleted (Code Improvements)
