Description			

History

#1 - 10/23/2012 07:04 PM - Eric Faulhaber

- Subject changed from create a variable to replace multiple uses of a constant string to create a variable to replace multiple uses of a string literal

If the same string literal is used in multiple places (in the same scope), implement a String variable and then reference it from those places, to avoid repeating the literal in code.

#2 - 10/31/2012 03:50 PM - Greg Shah

- Target version set to Code Improvements

#3 - 11/16/2016 12:47 PM - Greg Shah

- Target version changed from Code Improvements to Converted Code Improvements - Deduplication
