Description			

History

#1 - 10/29/2012 10:55 AM - Eric Faulhaber

Create and use (in frame definitions) common case widget constructors that take things like: label, format string, data type, legacy name... so that the majority of the setter code in the frame def can be eliminated (reduced to some constructor parameters).

#2 - 10/31/2012 03:47 PM - Greg Shah

- Target version set to Code Improvements

#3 - 11/16/2016 12:39 PM - Greg Shah

- Target version changed from Code Improvements to Converted Code Improvements - Deduplication
