### History

#### #1 - 10/31/2012 02:50 PM - Greg Shah

- Target version set to Milestone 12

#### #2 - 02/18/2013 06:48 PM - Greg Shah

The following are high priority:

FIRST-TAB-ITEM  
NEXT-TAB-ITEM  
HWND

#### #3 - 02/21/2013 06:24 AM - Eugenie Lyzenko

- File evl\_upd20130221a.zip added

- File ui\_attr\_test.p.20130221a.zip added

Adding conversion support for

FIRST-TAB-ITEM  
NEXT-TAB-ITEM  
HWND

UI attributes.

#### #4 - 02/21/2013 05:20 PM - Greg Shah

Feedback:

1. methods\_attributes.rules is missing a history entry.
2. Please use HWND instead of HWnd in method names (e.g. getHWND() instead of getHWnd()).

Otherwise this looks fine.

**#5 - 02/21/2013 06:06 PM - Eugenie Lyzenko**

- File `evl_upd20130221b.zip` added

The refresh for drop has been uploaded.

**#6 - 02/22/2013 01:26 PM - Greg Shah**

Please merge with the latest bzd revision and upload for a final review. Then we will go into conversion testing (runtime testing will be deferred).

**#7 - 02/22/2013 02:10 PM - Eugenie Lyzenko**

- File `evl_upd20130222b.zip` added

Merged with latest bzd uploaded.

**#8 - 02/22/2013 02:21 PM - Greg Shah**

Is this also merged with the [#2005](#) changes? I want them both in the same update.

**#9 - 02/22/2013 02:43 PM - Eugenie Lyzenko**

- File `evl_upd20130222c.zip` added

The merged version combined with [#2005](#) changes has been uploaded.

**#10 - 02/22/2013 02:46 PM - Greg Shah**

Looks great. It is going into testing now.

**#11 - 02/22/2013 04:04 PM - Greg Shah**

Testing passed. Please check it in and distribute the update. ASAP.

**#12 - 02/22/2013 04:12 PM - Eugenie Lyzenko**

The update `evl_upd20130222c.zip` has been committed in bzd as 10188.

**#13 - 05/02/2013 07:34 PM - Greg Shah**

The HWND can be avoided for the server project. It is only used in `common/asplpr2.p`:

```
00222     IF "TTY" = "TTY"
00223     THEN ASSIGN      iv-hwnd = 0.
00224     ELSE ASSIGN      iv-hwnd = CURRENT-WINDOW:HWND.
```

Because of preprocessing, the `iv-hwnd` will always be 0 on the server (which makes sense, since it is not interactive and the HWND value is only important for interactive cases).

**#14 - 03/23/2016 12:09 PM - Greg Shah**

I know that HWND is not supported and we won't be implementing it since there is no analog in Swing/Web.

Constantin: I think our FIRST-TAB-ITEM/NEXT-TAB-ITEM implementation is complete, right? I see that GenericWidget reports UnimplementedFeature.unsupported() but that is OK since FieldGroup does support it fully, if I understand correctly.

**#15 - 03/23/2016 12:15 PM - Constantin Asofiei**

The only part is missing is FRAME:NEXT-TAB-ITEM.

**#16 - 03/23/2016 12:51 PM - Greg Shah**

It is used in the customer's GUI app...

I'm going to create a new task for that. We'll need to do that soon.

**#17 - 03/23/2016 12:52 PM - Greg Shah**

- Status changed from New to Closed

**#18 - 11/16/2016 12:12 PM - Greg Shah**

- Target version changed from Milestone 12 to GUI Support for a Complex ADM2 App
