Description			

History

#1 - 10/30/2012 02:14 PM - Eric Faulhaber

Today, extent fields are automatically normalized into separate tables. For cases where a customer used "packed" extent fields in a way that perhaps would be better represented by separate fields, provide an option to split these out with custom hints. Note that this can only work if all references to extent fields in business logic use constant index references (so they can be calculated at conversion time).

#2 - 10/31/2012 03:19 PM - Greg Shah

- Target version set to Code Improvements

#3 - 03/28/2016 12:02 AM - Eric Faulhaber

- Status changed from New to Closed

- % Done changed from 0 to 100

#4 - 11/16/2016 12:35 PM - Greg Shah

- Target version changed from Code Improvements to Converted Code Improvements - Deduplication
