History

#1 - 11/02/2012 10:44 AM - Greg Shah

- Estimated time changed from 4.00 to 8.00

Please see [#1565](#) for details, but to summarize:

1. P2J_HOME had to be explicitly set via java -DP2J_HOME=.
2. The file encoding has to be explicitly set via java -Dfile.encoding="UTF-8"
3. Make sure logging for the build is implemented. We want output to both the console and to a conversion log file. In Linux we usually do this with "tee". Can we support this feature via ant in both Linux and Windows?
4. Any other changes (as shown in the .cmd scripts in [#1565](#)) needed to get conversion to run.

Don't forget to document all of these things in the Conversion Handbook.
