Statements like :
COLOR DISPLAY red book.price.

This fails with:

EXPRESSION EXECUTION ERROR:

```

The following statements work the same as COLOR DISPLAY statement (no buffer is used):

```
enable book.book-title.  
disable book.book-title.  
next-prompt book.book-title.  
underline book.book-title.
```

Added proposed update

#4 - 02/26/2013 01:57 PM - Constantin Asofiei

The changes look good, I'm putting this into conversion regression testing.

#5 - 02/26/2013 03:58 PM - Constantin Asofiei

There is a buffer scope change in *so/serv53-r.p* for buffer *co-bnchmrk*, but this is expected, as an UNDERLINE statement for a field in this buffer has been setting the scope for the buffer to the wrong block.
