- Assignee changed from Constantin Asofiei to Vadim Gindin

Implement runtime support for DESELECT-ROWS and MOVE-BEFORE-TAB-ITEM. Please put all history entries in the parent task ([#1805](#)).

#### #3 - 06/06/2014 10:06 AM - Greg Shah

- Status changed from New to Closed

#### #4 - 08/11/2014 01:29 PM - Vadim Gindin

During the work on that task I found that DESELECT-ROWS is already implemented and only some error checking was needed. I added that check. All other big work was made for MOVE-BEFORE-TAB-ITEM. At the end of work on that task I forgot to commit changes for DESELECT-ROWS. Here is the update for with these changes.

#### #5 - 08/11/2014 01:41 PM - Greg Shah

Code Review 0811a

1. This code needs null protection since query can be null.

```
if(!query.isOpen().getValue() || query.getNumResults().intValue() == 0) {
```

2. Doesn't the inclusion of the . (2108) into the error string cause this portion to be "doubled up" in the resulting output?

```
String msg = "Browse widget must contain at least one record before DESELECT-ROWS method is used. (2108) ";
```

3. There should be a space between the if and the following ( in 2 places.

4. The opening { needs to be on its own line.
