If code spits like this:

```
def var hHandle as handle no-undo.  
hHandle = session.  
hHandle = hHandle:first-child.
```

Then conversion works fine and java code is correct.

#2 - 04/03/2014 11:32 AM - Greg Shah

- Description updated

Next 4gl code produce uncompilable java code:

```
def var hHandle as handle no-undo.  
hHandle = session:first-child.
```

Java code:

```
handle hHandle = new handle();  
  
public void body()  
{  
    hHandle.assign();  
}
```
