Description			

History

#1 - 06/30/2014 05:39 AM - Hynek Cihlar

The following program

```
def temp-table tt field f as int extent 4 init [2, 3, 7, 11].
```

```
create tt.  
find first tt.
```

```
message f[1] f[2] f[3] f[4].
```

outputs "2 2 2 2".

#2 - 06/30/2014 07:08 AM - Hynek Cihlar

- Subject changed from *Wrong values initialized by a field initializer* to *Wrong values initialized by field initializer*

#3 - 07/02/2014 06:27 AM - Greg Shah

- Project changed from *Base Language* to *Database*

This is a database issue more than a base language issue.

Eric will determine if this needs to be worked now, or if it can be deferred.
