History

#1 - 08/26/2014 02:31 AM - Marius Gligor

Marius Gligor wrote:

PUT-KEY-VALUE COLOR (n | ALL) is used to save COLOR-TABLE of current environment on a persistent storage, P2J server directory. Environments should be managed on a per user manner.

For more details see [#1793](#) notes 20 and 22.

#2 - 08/26/2014 08:14 AM - Greg Shah

- Subject changed from implements PUT-KEY-VALUE COLOR (n | ALL) to implement PUT-KEY-VALUE COLOR (n | ALL)
