History

#1 - 10/23/2014 12:05 PM - Constantin Asofiei

See notes 395, 396, 397 in [#2252](#) - we need a way to disable the popup menu associated with the OS window, when ALT+Space is pressed (different OSs might have different key combinations, ALT+Space works for Windows and Ubuntu). There is an window state listener added in GuiSimulator, which resizes the window back to the previous dimension when the OS window maximize is used, but this looks like it works only on Windows.
