Description

History

#1 - 06/26/2015 04:12 PM - Stanislav Lomany

Scenario:

```
 _____
| |                  | |
| |      f1 f2       | |
| | _____  | |
| |*        1 text10 | |
| |*        2 text20 | |
| |*        3 text30 | |
| |*>       4 text40 | |
| |*        5 text50 | |
| |*        6 text60 | |
| |_____| |
```

After the new row has been added and the value was manually updated:

```
 _____
| |                  | |
| |      f1 f2       | |
| | _____  | |
| |*        1 text10 | |
| |*        2 text20 | |
| |*>     333 text30 | |
| |*        4 text40 | |
| |*        5 text50 | |
| |*        6 text60 | |
| |_____| |
```

After scrolling out of the view and then back again:

```
 _____
| |                  | |
| |      f1 f2       | |
| | _____  | |
| |*>       1 text10 | |
| |*        2 text20 | |
| |*        3 text30 | |
```

```
||*          333 text30      ||
||*            4 text40      ||
||*            5 text50      ||
| └────────────────────────┘ |
└───────────────────────────┘
```

So the new row was actually added, but the rows above it were not shifted properly.

Reproduction - uast/browse/brws-offset6.p:
esc-R, a, 222, down to 6, down (note we have two rows number 6), down, up to 222.
