

## User Interface - Bug #2600

Bug # 2596 (New): Implement missing browse quirks.

### Implement proper refresh after deletion if the deleted row is a new row outside of the view

06/26/2015 07:45 PM - Stanislav Lomany

<b>Description</b>			

### History

#### #1 - 06/26/2015 08:12 PM - Stanislav Lomany

Example of the behavior - uast/browse/brws-offset5.p:

down to 10, n, esc-R, up to 1, d - scrolled to 10.

The issue is that we do not know the position of an uncommitted row among existing rows if it is out of the view. Maybe we should save for new rows the nearest existing row in SelectedRow.
