Description				

History

#1 - 06/28/2015 05:37 AM - Stanislav Lomany

When some of the records contained in a browse are deleted in background (by DELETE, not DELETE-*-ROW(S)), "gaps" in row numeration appear. There gaps can be "closed" and numeration become continuous again after some navigation actions in browse.

E.g. - uast/browse/brws-gap.p:
Down to 13, d, up to 7, n, up, n, up, n - output is "7, 6, 2" - you can see the gap between 2 and 6
then continue with esc-up, esc-down, up to 7, n, up, n, up, n - output is "4, 3, 2" - you can see that the gap between 2 and 6 is closed.
