It seems that there is a misprint in the com.goldencode.harness.test.SendKey. The format specification SPEC3 is:

```
/** Another format specification for drain mode. */
private static final String SPEC3 = "timeout occurred before all output " +
    "could be read (%d bytes read)";
```

and it is used as:

```
reason = String.format(SPEC3, reason, newCount);
```

which results in a confusing error message. I suggest to modify the format like this:

```
private static final String SPEC3 = "timeout occurred before all output " +
    "could be read [%s] (%d bytes read)";
```

#2 - 08/14/2015 08:27 AM - Igor Skornyakov

created task branch 2639a

#3 - 08/14/2015 08:35 AM - Igor Skornyakov

Fixed format literal.

Committed to branch 2639a, revno 8

#4 - 08/14/2015 09:14 AM - Greg Shah

Code Review Task Branch 2639a Revision 8

It looks good. Merge to trunk when it passes your testing.

#5 - 08/14/2015 03:54 PM - Igor Skornyakov

It seems that the changed harness works fine. Can I merge my changes?

Thank you.

#6 - 08/14/2015 04:02 PM - Greg Shah

Yes, please do. As with [#2603](#), when you send out the notification email, make sure you explain to people that how they can pull down the latest harness code to their devsrv01 testing environments.

#7 - 08/14/2015 04:20 PM - Igor Skornyakov

The task branch passed regression testing and was merged with the harness trunk and checked in as revision 8.

#8 - 08/14/2015 04:30 PM - Greg Shah

make sure you explain to people that how they can pull down the latest harness code to their devsrv01 testing environments.

I think you forgot this part.

Also: please archive both task branches 2603a and 2639a.

I think you forgot this part.

Also: please archive both task branches 2603a and 2639a.

Sorry, I've sent an additional mail. Actually I've archived 2603a and 2639a. There was however 2603aa branch which I've created by mistake. It is removed now.
