

User Interface - Bug #2730

Bug # 2677 (New): fix drawing and functional differences between P2J GUI and 4GL GUI

taller than default fill-in height causes text to be vertically mis-positioned

09/23/2015 11:45 AM - Greg Shah

History

#1 - 09/23/2015 11:47 AM - Greg Shah

As can be seen in [#2715-5](#) the text of a fill-in can be vertically centered in the 4GL when the fill-in is taller than the default (based on the font?) AND when the fill-in is also ENABLED. Non-ENABLED fill-ins seem to place the text at the top vertically.

#2 - 10/16/2015 02:21 AM - Constantin Asofiei

- Status changed from New to WIP

#3 - 10/16/2015 02:21 AM - Constantin Asofiei

- Assignee set to Constantin Asofiei

#4 - 10/16/2015 12:49 PM - Constantin Asofiei

This is solved part of [#2704](#) , 1811s rev 10976. It can be closed.
