History

#1 - 10/23/2015 08:35 AM - Greg Shah

This can be recreated with simpler_alert_box.p. You cannot click on any button with the mouse (but enter and space on keyboard work).

Moving the alert-box using the mouse is also broken.

In 1811s rev 11033, there are other problems with the key processing which are being worked in #2775.

#2 - 10/23/2015 08:36 AM - Greg Shah

The described mouse processing does work in the Swing GUI client for 1811s rev 11033.

The last diff fixes the MouseHandler to enable/disable focus processing. If the windows OS events processing flag is enabled, MouseHandler enables focus processing for its window.
