The following program doesn't show the correct number of entries in combo-box drop-down.

```
DEF VAR cb AS CHAR VIEW-AS COMBO-BOX INNER-LINES 3 LIST-ITEMS
    "item1", "item2", "item3", "item4".

FORM cb WITH FRAME f SIDE-LABELS.
ENABLE ALL with frame f.

/* trigger push to the client, this is the key part */
cb:LABEL = "xxx".

WAIT-FOR GO OF FRAME f.
```

Is this in GUI, ChUI or both?

This issue is in the trunk?

Yes.

- *Target version set to Milestone 12*
- *Start date deleted (11/09/2015)*
- *Subject changed from Wrong number of inner lines in COMBO-BOX to wrong number of inner lines in COMBO-BOX*

This is the fix for issue. ComboBoxWidget.finishSetup() recalculates the INNER-LINES value after explicitly set. And this adjustment looks strange at least. Moreover there is a minimum of 3 lines for combo-box. Tested in both GUI and ChUI.

Can I commit this update to 2677b?
