In the movie-selection combo-box, when opening the drop-down, instead of Pulp Fiction P2J displays Pulp Fic. Same after the Pulp Fiction entry is selected - in the combo-box, it is trimmed.

Currently, the combo's items are not collected in the ui_strings.txt, during conversion. But this should not affect the combo-box - I think the text needs to be drawn fully, just clipped with the combo's or drop-down's width.
