Description			

History

#1 - 12/14/2015 04:06 PM - Igor Skorniyakov

- File *cb-active.p* added

When the drop-down COMBO-BOX (DROP-DOWN and DROP-DOWN-LIST mode) is active then ON <key> ANYWHERE is not invoked and WAIT-FOR ... PAUSE is never ended.

How to reproduce:

Run the attached program.

1. Activate drop-down for cb0! or @cb1 and press CTRL-W. With ABL the trigger will be invoked but with p2j it will not.
2. Press CTRL-W while drop down is not activated. After the next message will be emitted 5 seconds will be displayed activate drop-down within 5 seconds interval. With p2j the second message wait ended will never be shown.

- Assignee set to Igor Skorniyakov

#3 - 12/29/2015 05:58 AM - Igor Skorniyakov

The first issue is fixed.

Committed to the task branch 2565a revno 10980.

#4 - 01/03/2016 01:12 PM - Igor Skorniyakov

There is a problem with fixing the second issue. Both WAIT-FOR ENDKEY OF DEFAULT-WINDOW PAUSE 5. and activated COMBO-BOX end up with the ThinClient.waitForEvent() method invoked from the main thread. It is unclear for me now how to deal with the issue in a single thread event processing model.

#5 - 01/04/2016 10:00 AM - Igor Skorniyakov

I was able to implement and test drop-down deactivation on the SET-WAIT-STATE with fixed first issue. May be it makes sense to postpone the second one and finish the [#2565](#) first?

Thank you.

#6 - 01/06/2016 10:33 AM - Greg Shah

May be it makes sense to postpone the second one and finish the [#2565](#) first?

Yes.

#7 - 01/06/2016 10:34 AM - Igor Skorniyakov

Yes.

Thank you Greg.
