Description

History

#1 - 12/21/2015 02:10 PM - Sergey Ivanovskiy

- File browse_screen_1366x768.png added

The browse header and body fonts are not usable (faded) if run the web client on the notebook with 1366x768 screen resolution. Please look at the attached picture. It is found on P2j trunc version.

#2 - 12/30/2015 09:26 PM - Greg Shah

From Constantin in note 36 of #2928:

> Sergey, related to #2944 and in general: in Firefox, we haven't found a way to disable anti-aliasing "on the page", via CSS or something else - only on the full browser can be disabled.

> #2944 might have something to do with anti-aliasing (beside some positioning issues, I think)- please check if you can disable anti-aliasing in other browsers.
