

User Interface - Bug #2986

Bug # 2677 (New): fix drawing and functional differences between P2J GUI and 4GL GUI

./demo/simple_windows.p opens the frame titled "second frame" with unset initial location coordinates, but the frame "P2j GUI Client" has the correct coordinates.

Sergey, both frames in both windows in simple_windows.p are positioned at the same relative location. Maybe the issue was already fixed?

#4 - 04/18/2016 07:15 AM - Sergey Ivanovskiy

Yes, it may be fixed by your recent commits in P2J trunc. This bug has an effect upon how a combobox places its dropdown list for the web client. If the bug is present, then a dropdown isn't opened exactly behind its combobox.

#5 - 04/18/2016 07:34 AM - Hynek Cihlar

Fixed by [#2954](#).
