Here is the stack of this error met in trunk:

```
Caused by: java.lang.IllegalStateException: widget is not in the container
    at com.goldencode.p2j.ui.client.widget.AbstractWidget.screenPhysicalLocation(AbstractWidget.java:850)
    at com.goldencode.p2j.ui.client.widget.AbstractWidget.getActualBounds(AbstractWidget.java:2329)
    at com.goldencode.p2j.ui.client.gui.driver.swing.SwingMouseHandler$9.run(SwingMouseHandler.java:292)
    at com.goldencode.p2j.ui.chui.ThinClient.waitForEvent(ThinClient.java:13256)
    at com.goldencode.p2j.ui.chui.ThinClient.waitForWorker(ThinClient.java:11202)
    at com.goldencode.p2j.ui.chui.ThinClient.waitFor(ThinClient.java:10776)
```

For example, the test demo/demo_widgets.p: just selecting items of combo-box chcb and at some moment we'll see this error. The error happen not each time we select an item.

Other test: demo/movie-ratings-dynamic.p, the field Select movie. After window is opened press space and after widgets will be enabled, select items in combobox Select movie. The error happen almost each time.

Could not reproduce the issue. I have tried several tests with combo boxes, including the above mentioned demo/demo_widgets.p and demo/movie-ratings-dynamic.p in both Swing and Web GUI. Possibly the problem has been already resolved since.

Vadim: can you recreate this on the current trunk?

#6 - 05/24/2016 01:34 PM - Greg Shah

Vadim: please test this and confirm if you can recreate it.

#7 - 05/31/2016 12:17 PM - Vadim Gindin

I've tested it and couldn't recreate it. So we can assume this task is not actual.
