Description			

History

#1 - 06/02/2016 10:19 AM - Sergey Ivanovskiy

The P2J combobox entry item is always selected and its background is colored if this widget has the input focus. Otherwise the original Progress 4GL combobox entry item can be unselected if its items list is displayed and a different item from this list is selected and the widget is focused. Please look at the original combobox dispalying a selected item from its list
