

User Interface - Bug #3361

In ChUI browse does not start editing when we tab back into it

History

#1 - 10/24/2017 11:58 AM - Stanislav Lomany

Testcase (run in ChUI):

```
DEF TEMP-TABLE tt FIELD f1 AS INTEGER
                    FIELD f2 AS character.
```

```
def var val as char.
def var i as integer.
repeat i = 1 to 20:
    CREATE tt.
    tt.f1 = i.
    tt.f2 = "test " + string(i).
end.
```

```
DEFINE QUERY q FOR tt SCROLLING.
OPEN QUERY q FOR EACH tt.
```

```
DEF BROWSE br QUERY q
DISPLAY
    tt.f1
    tt.f2
enable tt.f1 tt.f2
WITH size-chars 50 by 10 TITLE "Static browse" separators.
```

```
DEF FRAME fr br SKIP(1) val
WITH TITLE "Frame" SIZE 70 BY 15 NO-LABELS.
```

```
ENABLE ALL WITH FRAME fr.
```

```
WAIT-FOR WINDOW-CLOSE OF DEFAULT-WINDOW.
```

Reproduction: TAB - TAB. Editing doesn't start while it should.

The obvious solution is to start editing in `BrowseImpl.onFocusGained`, however my old comment in `Browse.onFocusGained` suggests that it should be done carefully.
