### History

#### #1 - 10/15/2018 09:18 AM - Ovidiu Maxiniuc

Recently, the AW client running as virtual desktop just froze. The only clue I found was in client log:

```
Exception in thread "WebRepaint" java.util.ConcurrentModificationException
    at java.util.LinkedList$Itr.checkForComodification(LinkedList.java:966)
    at java.util.LinkedList$Itr.next(LinkedList.java:888)
    at com.goldencode.p2j.ui.client.gui.driver.webGuiWebSocket.sendPendingDrawingOps(GuiWebSocket.java:1605)
    at com.goldencode.p2j.ui.client.gui.driver.webGuiWebEmulatedWindow.drawOnScreenBitmap(GuiWebEmulatedWindow.java:814)
    at com.goldencode.p2j.ui.client.gui.driver.webGuiWebDriver$RepaintThread.run(GuiWebDriver.java:2111)
```

I guess these are rare cases. The cause seems to be the accesses to hoverableWidgets of GuiWebSocket not being synchronized in any way.
