Duplicates Conversion Tools - Bug #3891: 3750a regression in comment attachment	**New**

History

#1 - 04/02/2019 10:07 AM - Eric Faulhaber

We recently (3750a?) introduced a regression in the handling of comments during conversion. Instead of emitting in their natural places in the code as before, comments seem to emit bunched up around the execute method, either just above, just below, or just inside the closing parenthesis.
