<b>Description</b>			

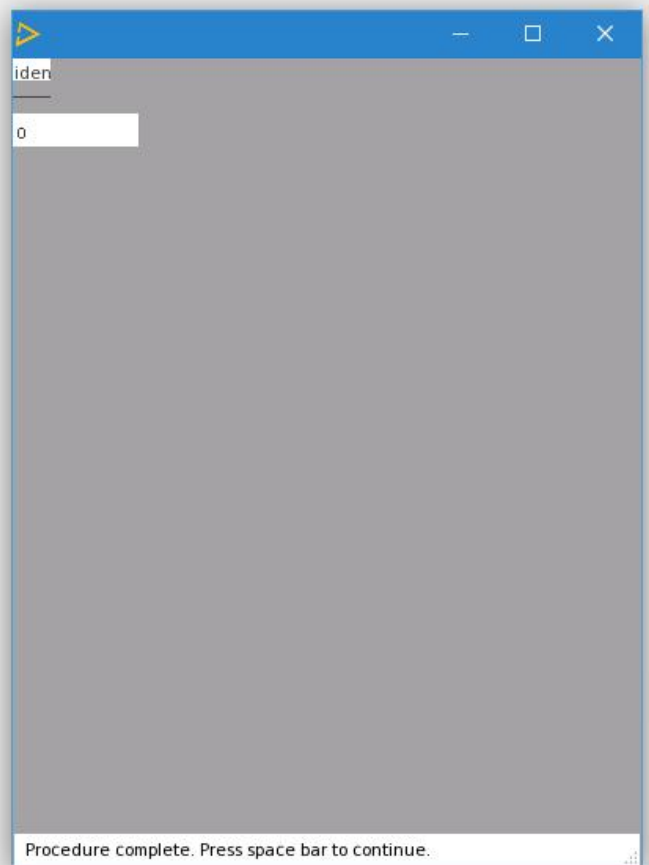

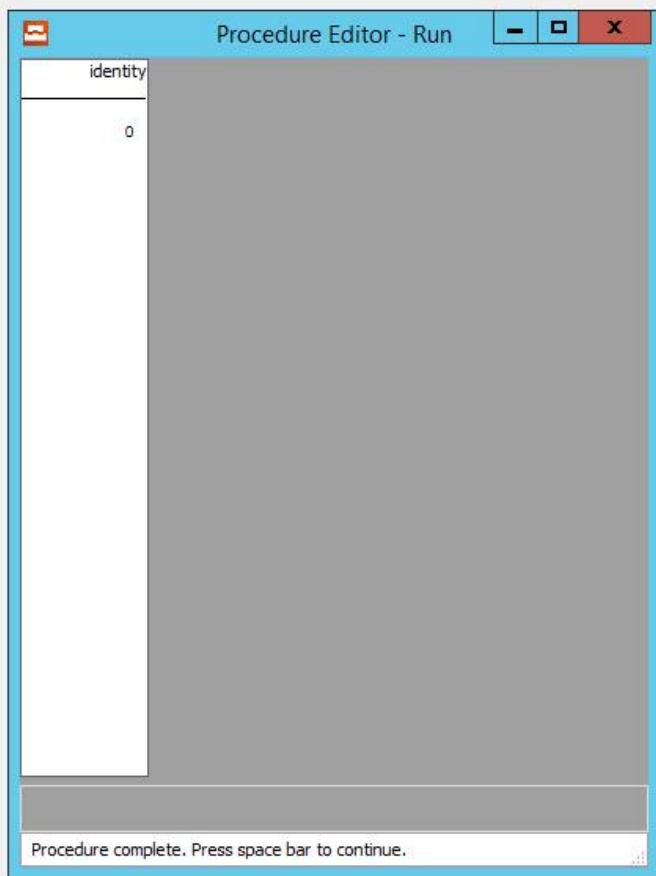

### History

#1 - 08/09/2019 08:47 AM - Vladimir Tsichevski

- File invalid-column-title.png added

As shown on the screenshot below, to display column titles, FWD uses the name of the field reference (ident), and Progress uses the name from the field declaration (identity).

```
DEFINE TEMP-TABLE C FIELD identity AS int.  
create c.  
FOR each C:  
  display c.ident.  
END.
```

**#2 - 08/09/2019 08:51 AM - Greg Shah**

This shows that the default column-label for a field is the name and that we are not handling that properly.

Do we handle the normal label properly in this case? You would have to add 1 down side-labels to the frame phrase of the display statement to see it.

**#3 - 08/09/2019 09:35 AM - Vladimir Tsichevski**

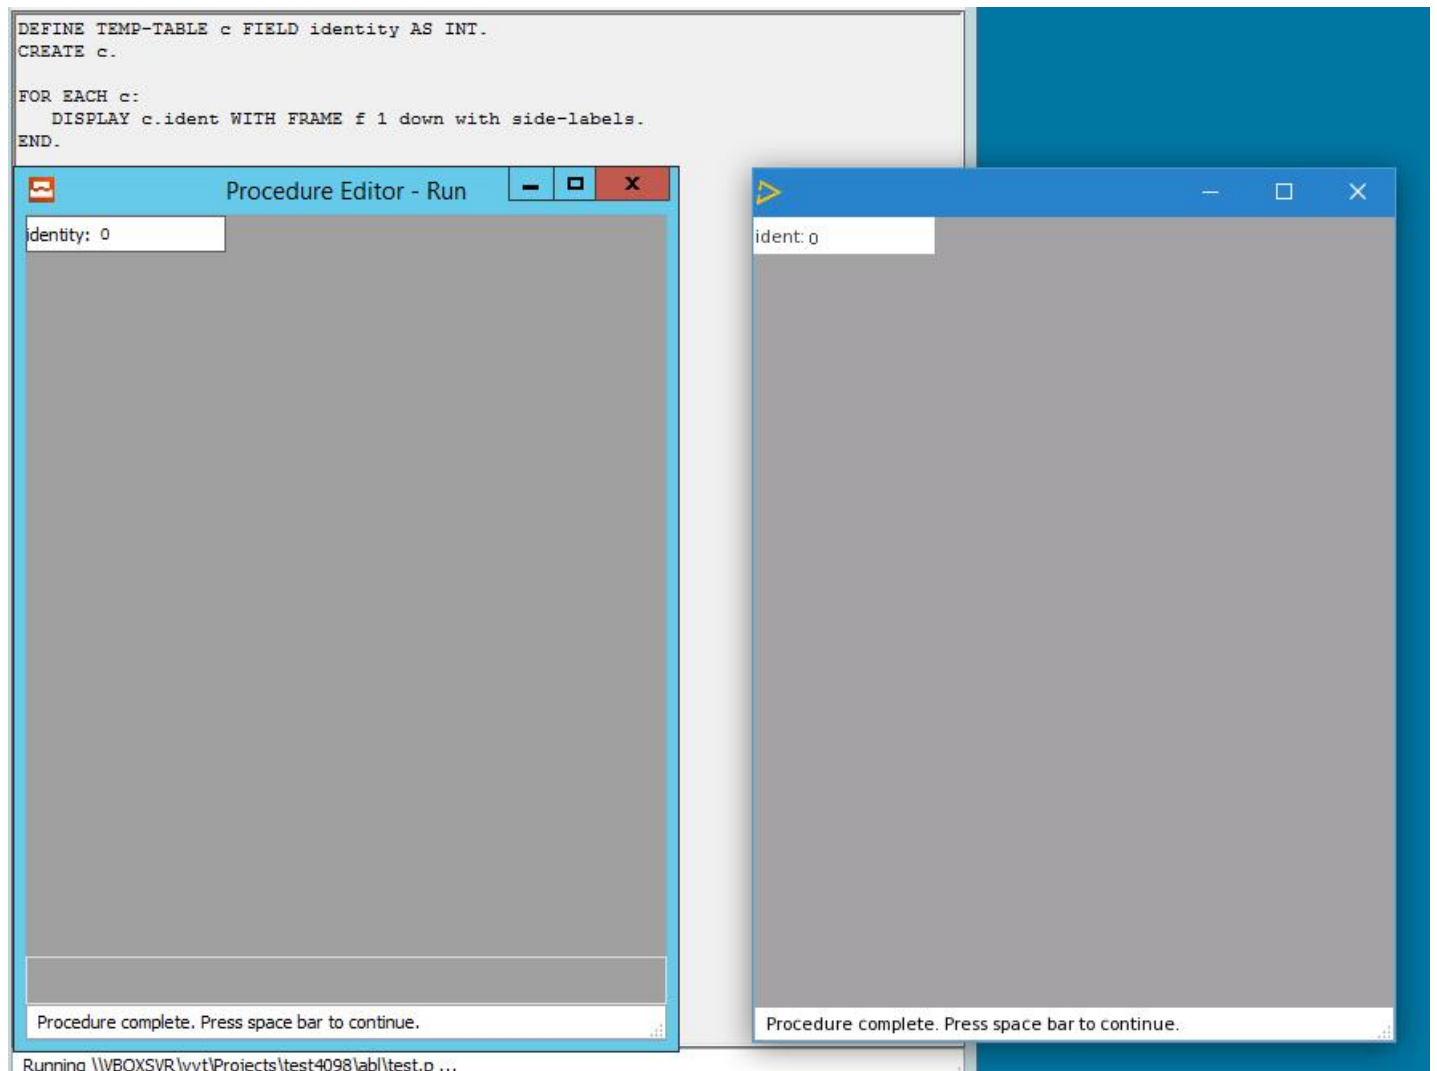

- File *invalid-column-title-side-labels.png* added

Probably not:
