#### History

##### #1 - 12/28/2020 09:44 PM - Greg Shah

This is a task to track the list of work needed to make the runtime very easy to configure and setup.

[#2316](#) improve directory XML encoding

[#1842](#) implement the multi-source directory approach

[#1845](#) create a simple tool (and docs) to provide easy creation/import of the configuration for a new server

[#5061](#) implement a tool to simplify the deployment/install of a converted application

[#4723](#) make it significantly easier to run database import

[#4463](#) create a runner process which makes it a simple one-step-process to convert and execute an arbitrary set of 4GL code
