Description			

History

#1 - 01/27/2021 03:32 PM - Vladimir Tsichevski

The following code fragment displays values from 0 to 2 in the frame, pausing for user input after each value is displayed.

```
DEFINE VARIABLE i AS INTEGER NO-UNDO.  
DO i = 0 to 2:  
    DISPLAY i WITH NO-BOX NO-LABELS.  
    DOWN 1.  
END.  
WAIT-FOR CLOSE OF THIS-PROCEDURE.
```

In FWD:

1. only the first value 0 is displayed
2. the message box Static handle type FRAME given to DELETE PROCEDURE or DELETE OBJECT statement. (5428) is opened, then the procedure is complete without waiting for user input.
