History

#1 - 07/12/2021 03:57 PM - Igor Skornyakov

Format-driven decimal-to-string conversion in FWD is incompatible with 4GL.

For example `public.tostring(3.1415926::numeric, '9(5)9.(4)9')` returns **3(5)9.(4)9** while `4GL string(3.1415926, '9(5)9.(4)9')` complains about invalid format character at position 2 (error 22).
