From Marian in [#4384-577](#):

When chaining method/properties access on an invalid object in 4GL there are two errors being throw, beside the [#3135](#) (invalid object) that is being thrown by FWD (when accessing the object's ref)there is also the #10068 (lead attributes in a chained-attribute expression must be type handle or a user defined type and valid).

```
DEF VAR o AS OpenEdge.Core.String.  
  
o:Clone():ToString() NO-ERROR.  
MESSAGE error-status:NUM-MESSAGES SKIP error-status:GET-MESSAGE(1)  
SKIP error-status:GET-MESSAGE(2)VIEW-AS ALERT-BOX.
```
