@45101 - recreate:

Consider this code:

```
run some-internal-proc ("some parm here")) no-error.
```

Notice the non-matching parenthesis. Progress does allow this to compile. In fact, there can be an unlimited number of extra trailing parenthesis and the code will still compile in Progress. P2J doesn't accept this at this time.

It isn't clear if that code just drops (ignores) the parenthesis OR if that is just treated as runtime preprocessor argument data. A test would be needed to check this.

#2 - 10/03/2011 07:18 PM - Redmine Admin

@45107 - Status set to WIP

#3 - 10/03/2011 07:22 PM - Redmine Admin

@45108 - Status set to WIP

@45109 - Status set to WIP

#5 - 10/11/2011 08:23 PM - Greg Shah

@45121 - solution (for now):

The parser code was modified to ignore (silently drop) any non-matched trailing RPARENS in a RUN statement. T

he same code is used for other statements, but this change only affects the RUN.

If the extra parens must be passed as arguments, then the parser will need to be changed again. The proper behavior has not been tested at this time.

#6 - 10/11/2011 08:24 PM - Redmine Admin

@45122 - Status changed from WIP to Closed

#7 - 04/12/2012 11:22 AM - Greg Shah
