

User Interface - Bug #6512

An opened menu item of a sub menu remains highlighted if the mouse pointer is moved out of it.

If the full menu item chain is displayed and the mouse pointer is moved out of that menu item, then it should not be highlighted. Now the full menu chain is highlighted when the mouse pointer is moved over another widget. In the picture below the mouse pointer is over the highlighted Button1 but the last menu item "Same" is still highlighted.
