History

#2 - 10/20/2022 09:53 AM - Constantin Asofiei

Beside the Administration Console, we need JMX instrumentation, for each started appserver, with:

- agents in use (currently processing requests)
- agents available (waiting for requests)
- max number of agents

#3 - 10/20/2022 09:57 AM - Constantin Asofiei

- Related to Feature #6814: JMX instrumentation for FWD core, persistence and ORM layers added

#4 - 10/20/2022 10:08 AM - Constantin Asofiei

The tracing should include the agent's PID, too, as currently this is being used in some logging files.

#5 - 10/31/2022 05:58 AM - Constantin Asofiei

JMX instrumentation for appserver agent state was added to 3821c/14333.

#6 - 10/31/2022 11:24 AM - Constantin Asofiei

Added documentation for available JMX instrumentation at [Available JMX Instrumentation](#)

#7 - 10/31/2022 12:10 PM - Greg Shah

It is really good. I made some minor tweaks.
