History

#2 - 02/28/2023 03:54 AM - Sergey Ivanovskiy

This is the common task for all differences in behavior of the original 4GL client and the swing and web clients for different code pages with Dutch system language/keyboard settings.

#5034-2101 (SBI) ~~Swing client doesn't work for dead key SHIFT + Quote for Dutch~~

If WINDOWS-1252 code page is selected, then this issue is not reproduced with the swing client.

```
<node class="container" name="i18n">
  <node class="string" name="cpinternal">
    <node-attribute name="value" value="1252"/>
  </node>
</node>
```

but there is a set of keys:

Q, W, E, R, T, Y, U, I, O, P
A, S, D, L,
Z, C, N, M

that should produce two events if CTRL and ALT are pressed with one of these keys.
For example, pressing CTRL, ALT, A produces two event codes: 1025 code with CTRL-ALT-A label and 225 code event with label á.
This is not working with the swing client.

#3 - 02/28/2023 04:00 AM - Sergey Ivanovskiy
- File test-editor-keys.p added

This is testcases/uast/keyboards/test-editor-keys.p 4GL testcase to reproduce differences in keys management.
