#### History

##### #1 - 05/15/2023 09:47 AM - Dănuț Filimon

There were several different results when comparing case-insensitive and case-sensitive values from where clauses, for more details, please refer to [#7108-8](#). If I remember correctly, some of the mentioned cases were solved after the RTRIM database option was added. There is also a problem when using FastFindCache where a cached value influences the results of the next statement that needs to be executed.

I created a test-suite for [#7108-8](#) which can be found in **testcases/rev.2374**.
