### History

#### #1 - 08/17/2023 08:24 AM - Greg Shah

If the basepath (in cfg/p2j.cfg.xml) ends in a backslash (e.g. <parameter name="basepath" value="./abl" /> instead of <parameter name="basepath" value="./abl" />, then the generated name\_map.xml will have incorrect pname attributes:

```
<class-mapping jname="possenet.src.adecomm.AsUtils" pname="ossenet/src/adecomm/as-utils.w">
  <method-mapping jname="adepersistent" pname="ADEPersistent" type="PROCEDURE"/>
  ...
```

instead of:

```
<class-mapping jname="possenet.src.adecomm.AsUtils" pname="possenet/src/adecomm/as-utils.w">
  <method-mapping jname="adepersistent" pname="ADEPersistent" type="PROCEDURE"/>
  ...
```
