Here's a testcase. A record was preselected by a query and then deleted in the same session. It is still returned by the preselect query. This issue has been in trunk for a long time.

```
def temp-table tt field f1 as integer.  
  
def var i as integer.  
create tt. tt.f1 = 1.  
create tt. tt.f1 = 2.  
  
def query q for tt scrolling.  
open query q preselect each tt.  
  
def buffer xtt for tt.  
find first xtt where xtt.f1 = 1. delete xtt.  
  
get first q.  
message tt.f1. // 2 in FWD, 1 in 4GL
```

- Assignee set to Alexandru Donica
- Status changed from New to WIP

This is already handled in #5768. There are multiple attempts to fix this (the last one is 5768c). This will be fixed once 5768c is merged.

#### #3 - 01/05/2024 04:06 AM - Alexandru Lungu

5768a was merged to trunk. This task can be Closed.
