#### History

##### #1 - 01/22/2024 03:51 PM - Vladimir Tsichevski

In ChUI FILL-IN is cleared with Ctrl-Z, this should reset date editor screen value to empty string. Currently, the value after clearing has format separators (for formats with separators).

Is this related to the auto-zap regression reported by Stanislav in #7143-583?

This issue is one of regressions caused by fixing the #7143-583 (the #7019 was re-opened for #7143-583).

When did we fix that? As far as I know, #7019 is still open to resolve that auto-zap issue.

Sorry. I was not correct, too much of different issues in parallel:

1. #7019 is still open. I have idea how to make an ultimate fix, but it will need much of reworking testing.
2. This issue is about date editing and has no connection to #7019, which is about numbers.

Is this fix in a branch? I recommend 8204a since it is a related issue.

I understand Tomasz tested this in 6667i with ChUI regression testing. Please report the regression testing results here and the next steps if any other testing is needed.

No, it is not. I ran ChUI regression suite with this fix and posted the same fix to Tomasz.

OK, with one note: the existing fix [#8204](#) has very limited scope (browse cells of the date type) and impact, and I do not think it could cause regressions.

The fix for this [#8210](#) task spans modifies all kinds of FILL-IN (all subclasses of DisplayFormat), and needs much more testing.

The results are in 20240128\_203948.tar.gz.

and the next steps if any other testing is needed.

I will test FILL-IN of all kinds manually.

OK, then put this in 8210a and get it reviewed and tested ASAP.

Done in 8210a rev. 14952. Please, review.

I've also tested the result manually in Swing GUI and Swing ChUI, and found no regressions so far.

Hynek: Please review.

Code review 8210a revision 14952.

NumberFormat.java and StringFormat.java require update in the copyright year, otherwise the changes look good.

Nothing I can think of right now.
