<b>Description</b>			

### History

#1 - 04/01/2024 01:26 PM - Vladimir Tsichevski

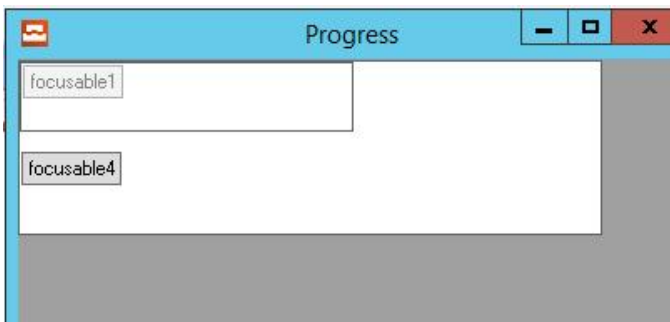

- File layout-issue-FWD.png added

- File layout-issue-OE.png added

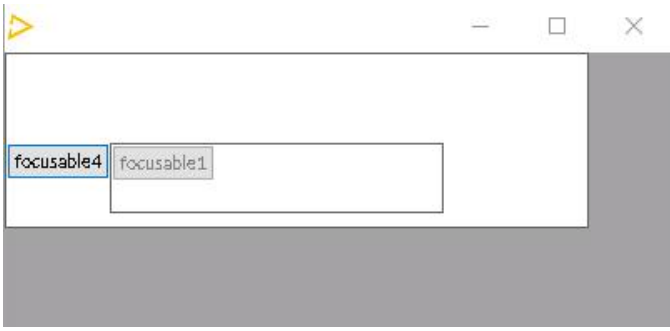

The following example:

```
DEFINE BUTTON focusable4.  
DEFINE FRAME outerFrame  
  focusable4 AT ROW 3.5 COL 1  
WITH SIZE 70 BY 5.  
  
DEFINE BUTTON focusable1.  
DEFINE FRAME innerFrame  
  focusable1  
  WITH SIZE 40 BY 2.  
FRAME innerFrame:FRAME = FRAME outerFrame:HANDLE.  
  
ENABLE ALL WITH FRAME outerFrame.  
  
WAIT-FOR GO OF FRAME outerFrame.
```

Should look like this:

but in FWD looks like this:

innerFrame without explicitly defined position, should be positioned at row 1 col 1, but it is positioned after the last frame child widget (focusable4).

## #2 - 04/01/2024 01:46 PM - Vladimir Tsichevski

The issue exists at least since the trunk rev. 14857, so it is not a recent regression.
